	Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.
	Remove breathing equipment only after contaminated clothing have been completely removed.
	In case of irregular breathing or respiratory arrest provide artificial respiration.
	Take care of personal protection for the first aider.
After inhalation:	Supply fresh air or oxygen; call for doctor.
	In case of unconsciousness place patient stably in side position for transportation.
	Take affected persons into fresh air and keep quiet.
After skin contact:	Immediately wash with water and soap and rinse thoroughly.
	Immediately remove contaminated clothing.
After eye contact:	Rinse opened eye for several minutes under running water. Then consult a doctor.
After swallowing:	Call for a doctor immediately.
· · · · · · · · · · · · · · · · · · ·	Drink plenty of water and provide fresh air. Call for a doctor immediately.

### **SECTION 5: Firefighting measures**

· 5.1 Extinguishing media

• Suitable extinguishing agents: CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam. • 5.2 Special hazards arising from the substance or mixture Under certain fire conditions, traces of other toxic gases cannot be excluded. Hydrocarbons, carbondioxide and -monoxid.

• 5.3 Advice for firefighters • Protective equipment: Mouth Do not

· Additional information

Mouth respiratory protective device. Do not inhale explosion gases or combustion gases. Cool endangered receptacles with water spray. Self-protection first!

#### SECTION 6: Accidental release measures

• 6.1 Personal precautions, protective equipment and	
emergency procedures	Keep away from ignition sources.
	In case of further temperature should be cooled with waterspray from a safe distance.
	Wear breathing apparatus with filter A during decomposition of materials.
	Wear protective equipment. Keep unprotected persons away.
· 6.2 Environmental precautions:	Inform respective authorities in case of seepage into water course or sewage system.
	Do not allow to enter sewers/ surface or ground water.
• 6.3 Methods and material for	
containment and cleaning up:	Dispose contaminated material as waste according to section 13.
	Ensure adequate ventilation.
	Large quantities should be diluted with suitable desensitation agent to a concentration below 10 % before disposal.
	Soak up with absorbant material (e. g. Vermiculit) and dispose of in accordance with government regulations.
· 6.4 Reference to other sections	See Section 7 for information on safe handling.
	See Section 8 for information on personal protection equipment.
	See Section 13 for disposal information.
	In case of large spillage the environmental authority should be informed.

### **SECTION 7: Handling and storage**

• 7.1 Precautions for safe	
handling	Keep away from heat and direct sunlight.
-	Ensure good ventilation/exhaustion at the workplace.
	Open and handle receptacle with care.
	Prevent formation of aerosols.
	Wear suitable respiratory protective device when decanting larger quantities without extractor facilities.
	Do not refill residue into storage receptacles.

#### **SECTION 10: Stability and reactivity**

· 10.1 Reactivity No further relevant information available. · 10.2 Chemical stability · Thermal decomposition / conditions to be avoided: SADT (Self Accelerating Decomposition Temperature) is the lowest temperature at which self accelerating decomposition may occur with substance in the packaging as used in transport. A dangerous selfaccelerating decomposition reaction and, under certain circumstances, explosion or fire can be cause decomposition at and above the temperature. Contact with incompatible substances can cause decomposition at or below the SADT. No decomposition if used and stored according to specifications. To avoid thermal decomposition do not overheat. · 10.3 Possibility of hazardous reactions Self-accelerating decomposition at SADT. 10.4 Conditions to avoid No further relevant information available.
