SECTION 6: Accidental relea	se measures
• 6.1 Personal precautions, protective equipment and	
emergency procedures	Remove persons from danger area. Keep away from ignition sources. In case of further temperature should be cooled with waterspray from a safe distance.

· 6.2 Environmental precautions:

Wear breathing apparatus with filter A during decomposition of materials. Wear protective equipment. Keep unprotected persons away. Do not allow to enter sewers/ surface or ground water.

· 6.3 Methods and material for containment and cleaning up: Ensure adequate ventilation. Large quantities should be diluted with suitable desensitation agent to a concentration below 10 % before disposal. Soak up with absorbant material (e. g. Vermiculit) and dispose of in accordance with government regulations. · 6.4 Reference to other sections In case of large spillage the environmental authority should be informed.

conditions to be avoided:	SADT (Self Accelerating Decomposition Temperature) is the lowest temperature at which self accelerating decomposition may occur with substance in the packaging as used in transport. A dangerous self-accelerating decomposition reaction and, under certain circumstances, explosion or fire can be cause decomposition at and above the temperature. Contact with incompatible substances can cause decomposition at or below the SADT. No decomposition if used and stored according to specifications. To avoid thermal decomposition do not overheat.
