#### **SECTION 4: First aid measures** · 4.1 Description of first aid measures General information: Immediately remove any clothing soiled by the product. Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident. Take care of personal protection for the first aider. · After inhalation: Supply fresh air and to be sure call for a doctor. In case of unconsciousness place patient stably in side position for transportation. Take affected persons into fresh air and keep quiet. · After skin contact: Immediately wash with water and soap and rinse thoroughly. Immediately remove contaminated clothing. · After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor. · After swallowing: Call for a doctor immediately. 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available. 4.3 Indication of any immediate medical attention and special No further relevant information available treatment needed

· 5.1 Extinguishing media

**SECTION 5: Firefighting measures** 

Suitable extinguishing agents: CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
 5.2 Special hazards arising from the substance or mixture Under certain fire conditions, traces of other toxic gases cannot be excluded. Hydrocarbons, carbondioxide and -monoxid.
 5.3 Advice for firefighters
 Protective equipment: Mouth respiratory protective device. Do not inhale explosion gases or combustion gases.
 Additional information Cool endangered receptacles with water spray. Self-protection first!

#### **SECTION 6: Accidental release measures**

<ul> <li>6.1 Personal precautions, protective equipment and</li> </ul>	
emergency procedures	Keep away from ignition sources.
	In case of further temperature should be cooled with waterspray from a safe distance.
	Wear breathing apparatus with filter A during decomposition of materials.
	Wear protective equipment. Keep unprotected persons away.
· 6.2 Environmental precautions:	Inform respective authorities in case of seepage into water course or sewage system.
•	
	Do not allow to enter sewers/ surface or ground water.
• 6.3 Methods and material for	
containment and cleaning up:	Dispose contaminated material as waste according to section 13.
•	Ensure adequate ventilation.
	Large quantities should be diluted with suitable desensitation agent to a concentration below 10 % before disposal.
	Soak up with absorbant material (e. g. Vermiculit) and dispose of in accordance with government regulations.
· 6.4 Reference to other sections	See Section 7 for information on safe handling.
	See Section 8 for information on personal protection equipment.
	See Section 13 for disposal information.
	In case of large spillage the environmental authority should be informed.

#### **SECTION 7: Handling and storage**

· 7.1 Precautions for safe	
handling	Keep away from heat and direct sunlight.
-	Ensure good ventilation/exhaustion at the workplace.
	Open and handle receptacle with care.
	Prevent formation of aerosols.

Only use tools made of suitable materials (e. g. polyethylene or stainless steel). Keep away from dirt, rust, chemicals in particular concentrated acids, alkalis and accelerators (e. g. hea metal compounds and amines). Avoid contact with skin and eyes. While using do not eat, drink or smoke. Avoid shock and friction. Do not smoke.	
explosion protection: Protect from heat.	
Prevent impact and friction.	
Fumes can combine with air to form an explosive mixture.	
Wear shoes with conductive soles.	
Avoid open flames, sparks, direct sunlight and other sources of ignition.	
· 7.2 Conditions for safe storage, including any incompatibilities	
Storage: Pay attention to the special requirements of your local autorithies for storing dangerous goods.	
Requirements to be met by storerooms and receptacles: Store only in the original receptacle.	
Prevent any seepage into the ground.	
Use only receptacles specifically permitted for this substance/product.	
· Information about storage in	
one common storage facility: Do not store or park organic peroxide together with heavy metal compounds and amines. Store away from foodstuffs, drinks and feeding stuffs.	
· Further information about	
storage conditions: Keep container tightly sealed.	
Protect from heat and direct sunlight. Protect from contamination.	
Store under lock and key and out of the reach of children.	
Storage in a collecting room is required.	
Recommended storage	
temperature (To maintain quality): +5 +25 °C	
Storage class: 5.2	
• 7.3 Specific end use(s) No further relevant information available.
