Trade name: PEROXAN PK295 V-90 (Contd. of page 1) · Additional information: For the wording of the listed hazard phrases refer to section 16. **SECTION 4: First aid measures** · 4.1 Description of first aid measures General information Take care of personal protection for the first aider. · After inhalation: Take affected persons into fresh air and keep quiet. · After skin contact: Immediately remove contaminated clothing. · After eye contact: Rinse opened eye for several minutes under running water. After swallowing: If symptoms persist consult doctor. 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available. 4.3 Indication of any immediate medical attention and special treatment needed No further relevant information available. **SECTION 5: Firefighting measures** · 5.1 Extinguishing media • Suitable extinguishing agents: CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam. 5.2 Special hazards arising from the substance or mixture Under certain fire conditions, traces of other toxic gases cannot be excluded. Hydrocarbons, carbondioxide and -monoxid. 5.3 Advice for firefighters · Protective equipment: Do not inhale explosion gases or combustion gases. Additional information Cool endangered receptacles with water spray. Self-protection first! **SECTION 6: Accidental release measures**  6.1 Personal precautions, protective equipment and emergency procedures Remove persons from danger area. Keep away from ignition sources. In case of further temperature should be cooled with waterspray from a safe distance. Wear breathing apparatus with filter A during decomposition of materials. Wear protective equipment. Keep unprotected persons away. · 6.2 Environmental precautions: Inform respective authorities in case of seepage into water course or sewage system. Do not allow to enter sewers/ surface or ground water. · 6.3 Methods and material for containment and cleaning up: Ensure adequate ventilation Large quantities should be diluted with suitable desensitation agent to a concentration below 10 % before disposal. Soak up with absorbant material (e. g. Vermiculit) and dispose of in accordance with government regulations. • 6.4 Reference to other sections See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information. In case of large spillage the environmental authority should be informed.

#### **SECTION 7: Handling and storage**

<ul> <li>7.1 Precautions for safe</li> </ul>		
handling	Keep away from heat and direct sunlight.	
-	Open and handle receptacle with care.	
	Prevent formation of aerosols.	
	Wear suitable respiratory protective device when decanting larger quantities without extractor facilities.	
	Handle with care. Avoid jolting, friction and impact.	
	Do not refill residue into storage receptacles.	
	Restrict the quantity stored at the work place.	
	Before break and at the end of work hands should be thoroughly washed.

conditions to be avoided:	SADT (Self Accelerating Decomposition Temperature) is the lowest temperature at which self accelerating decomposition may occur with substance in the packaging as used in transport. A dangerous self-accelerating decomposition reaction and, under certain circumstances, explosion or fire can be cause decomposition at and above the temperature. Contact with incompatible substances can cause decomposition at or below the SADT. No decomposition if used and stored according to specifications. To avoid thermal decomposition do not overheat.
